This page is the home page of our software. The default time of the clock is set to "Local Time". If the user clicks anywhere on the map then time of that particular place is displayed on an analog clock. There are four other options for the user to choose.
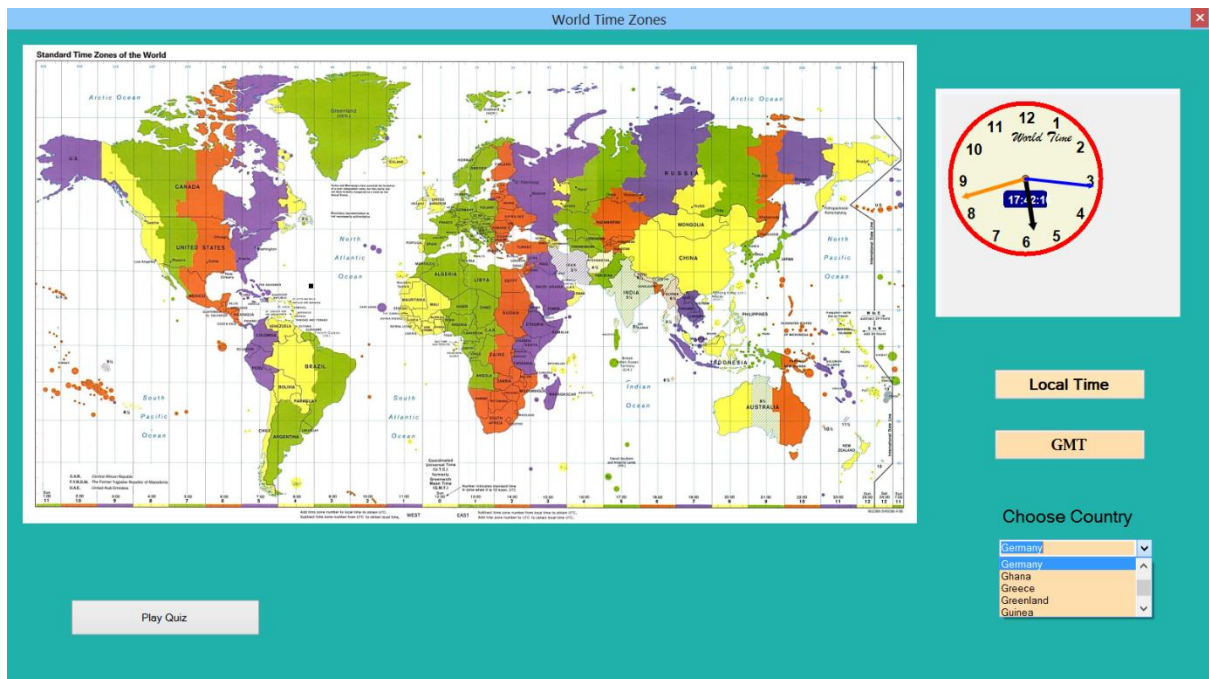

1- The user can click on the button named "Local Time". As soon as he clicks, the clock will show local time.

2- The user can click on the button named "GMT". As soon as he clicks, the clock will show Greenwich Mean Time (0'0 longitude).

3- The user has an option to choose country from the drop down box which is at the rightmost   bottom of the screen. Current time of the country chosen is shown by the clock.

4- User also has an option to play quiz by clicking on the "Play Quiz" button.

The Window shown above shows up if play quiz button is clicked. This is the home page of the quiz.
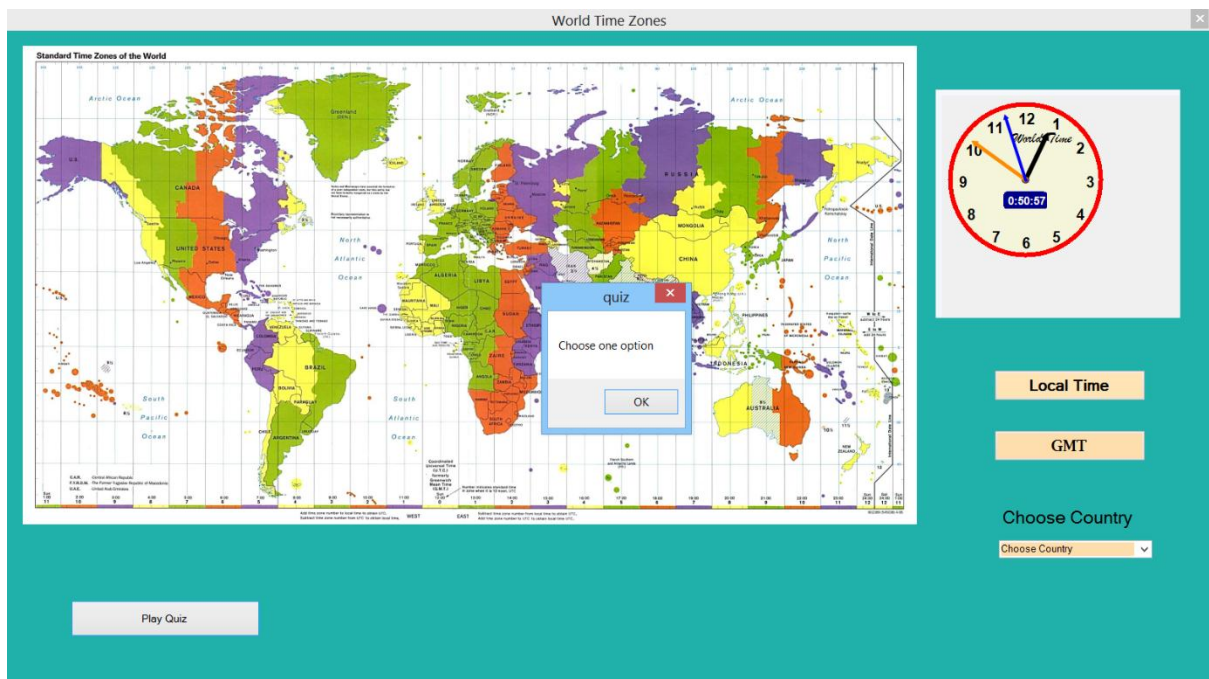

-If user chooses the "About" option then then the window shown below shows on the screen which contains basic information about the quiz. From this window he/she can directly start playing the quiz.

-If the user clicks on the "PLAY!" button then the window shown below pops up.

-User has to click on a single option in order to proceed to the next question. If he does not do so then a message box with text "Choose one option" pops up and he/she is again asked to answer the same question.

-If the user chooses a single option which is also the wrong option then he is advanced forward to the next question and a message "Wrong Answer" along with the respective correct answer is displayed.
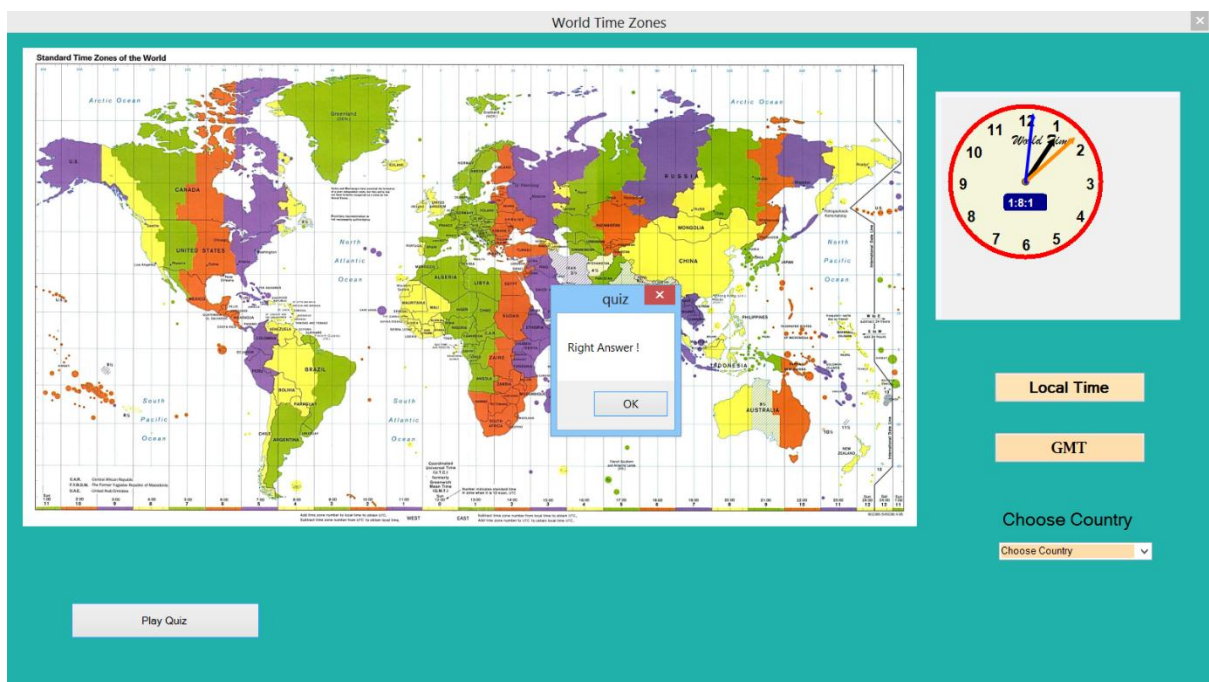

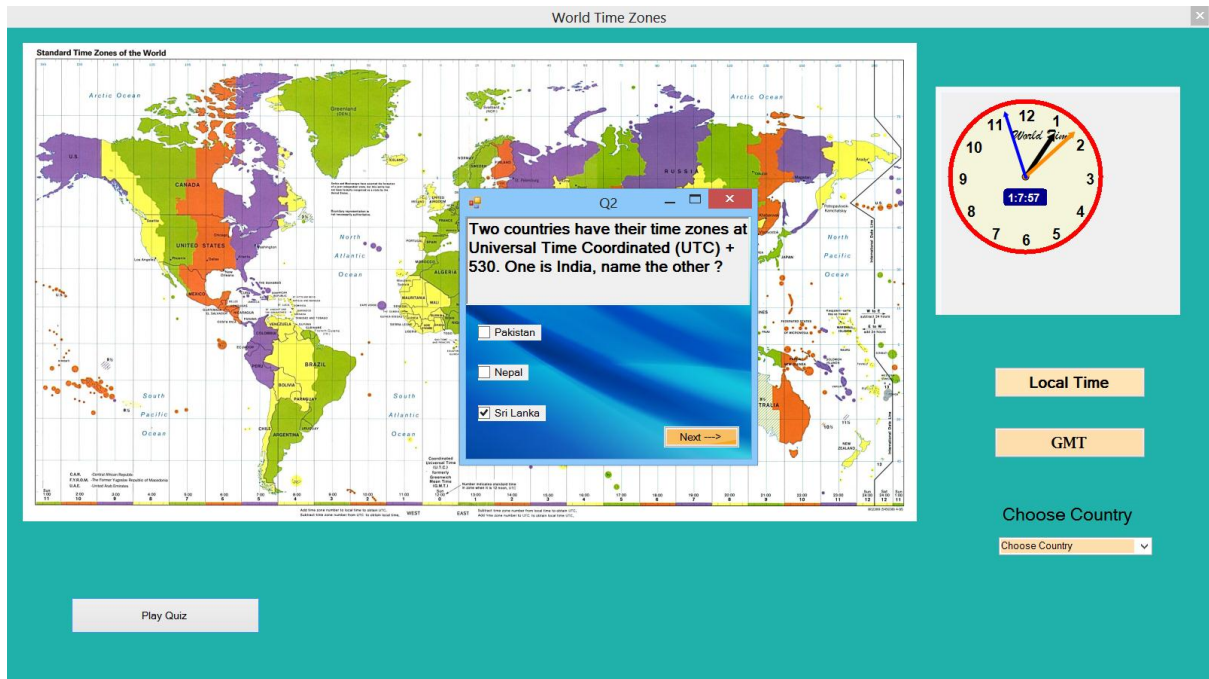

-If the user chooses a single option which is also the correct option then he is advanced forward to the next question and a message "Correct Answer" is displayed.

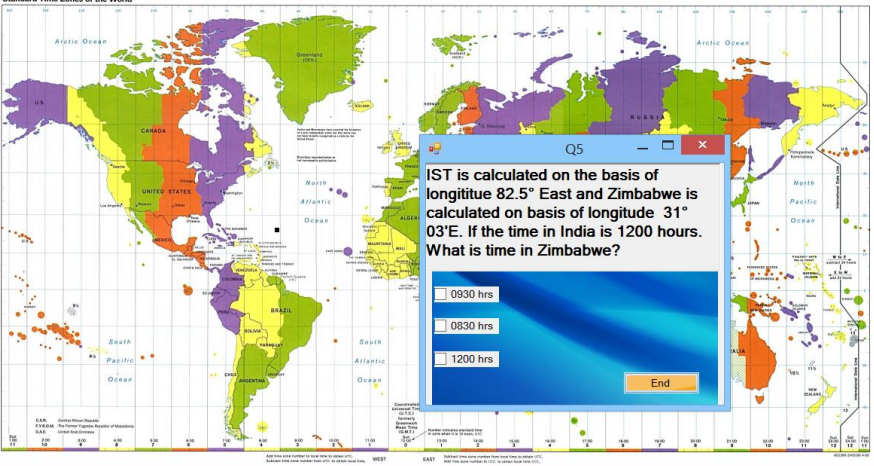

The user can end the quiz after answering the last question by clicking on the "End" button.

The answer for the last question is automatically submitted if he/she clicks on the end button and the user is redirected to the home page of the software.
